RE: Permission to share PACTG/IMPAACT data with PHACS

The IMPAACT leadership and the protocol teams have approved your request to obtain data from the following studies: P1025, 247, 316, P1045, P1055, P1057, 076, 152, 185, 225, 227, 230, 239, 254, 300, 310, 326, 330, 345, 353, 354, 382, 394, P1010, P1022, P1024, P1039, P1047

It is noted that the data requested is:

For any perinatal treatment trial or other study which enrolled mothers of PHACS subjects:

- maternal ART during pregnancy
- maternal viral load, CD4 and concomitant medication use during pregnancy
- maternal toxicology screen results during pregnancy
- maternal illicit drug use (if collected by questionnaire or other means than tox screen)
- complications/infections during pregnancy
- pregnancy/delivery information (gestational age, apgar scores, birth weight, type of birth (C-section, vaginal))

For any IMPAACT study which previously enrolled PHACS subjects (infected or uninfected):

- subject non-ART prior to enrollment in PHACS (OI treatment/prophylaxis meds since birth)
- subject ART since birth (neonatal prophylaxis, for uninfected)
- subject's viral load measures since birth (for infected only)
- subject's lymphocyte subset measures since birth (for infected only)
- any diagnoses since birth
- height/weight measurements since birth
- past neuropsych evaluations (i.e., WISC, WPPSI, Bayley, etc)

Sincerely,

Brooks Jackson, M.D.
IMPAACT SOC/NEC Chair
